

## HEALTH & SAFETY TRAINING

### CUSTOMIZED FOR YOUR STAFF NEEDS

This employee training assists with **OSHA compliance, CDC Guidelines and Infection Control**. Get access to training all year long for annual refresher training, new hire training, when new hazards are introduced into the workplace, or when employees are working with new hazards. Includes OSHA-required written training documentation, consulting with training Q&A, plus CE credit if needed. Live onsite is superlative, but virtual or video is also available.

#### LIVE ONSITE

- Most collaborative approach
- Interactive group setting with live presenter/facilitator
- Assistance in completing required testing and training documents if needed
- Includes online video for 1 year

#### LIVE VIRTUAL

- Alternative solution for an interactive live presentation
- Delivered in a webinar format for a group setting
- Includes recording of live webinar accessible online for 1 year

#### ONLINE VIDEO

- View recorded training online at your own pace
- Train individual employees, especially those with different work schedules
- Useful in a team training or even when a gathering is not feasible
- One year of access to video

*"Thank you for such a great safety presentation...The move to a virtual presentation was flawless. Our staff obviously missed having an in-person presenter but you did a perfect job. Also kudos to the Safelink team for a high quality slide presentation...Best ever! We appreciate your team and thank you for keeping us on track to being a safe work place!" Lisa V, Dental Laboratory Administrator*
