

# Customized Health & Safety Manual for General Industry

## A Turn-Key Solution to Fit Your Business Needs

With a manual that's customized to your business procedures, you can feel confident you will have all materials needed to assist in meeting OSHA's written documentation requirements.

### This Customized Health & Safety Manual Includes:

- The most up-to-date info available to aid in addressing health and safety hazards in your workplace
- All federal and any state OSHA required documentation plus tools to assist with your safety training program
- One hour of consulting to assist in manual preparation
- Delivered in an electronic download format

### Program Content Can Include the Following Programs To Fit Your Business Needs:

- Infectious Disease Preparedness & Response Plan, Exposure Control, Personal Protective Equipment, Respiratory Protection, Chemical Safety / HazCom, Safety Procedures, Lockout Tagout, Emergency Action Planning, Ergonomics, Vehicle Operators, Safety & Health Training, Injury & Illness Recordkeeping, Equipment Maintenance, Noise Monitoring, Silica Exposure Control, Walking/Working Surfaces, plus more

### State Plan Add-on

- A more detailed state-specific plan is available for the following states for an additional fee: California, Michigan, Minnesota, or Washington state

### Hardcopy Version Add-on

- Includes all components of the electronic download as shown above plus a hardcopy manual—all documents are organized in a heavy-duty binder with color documents separated by tab sections. Includes shipping within the continental U.S. ground service.
