Cybersecurity & HIPAA Webinar—Protecting Patient Data in a Connected Practice or Lab

Join Us December 11, 2025, 7:00pm - 8:00pm ET

For This Live Webinar Event: Register for Course

Course Description:

Senior Compliance Advisors Gary Morgan and Matt Rahman bring their deep expertise to this essential session on the intersection of HIPAA and cybersecurity. As technology continues to expand the ways dental practices and laboratories exchange information—including Protected Health Information (PHI)—the responsibility to safeguard that data has never been more critical.

This course demystifies the requirements, clarifies your obligations, and provides practical strategies to reduce liability, protect patient privacy, and keep your operations running smoothly.

Course Objectives:

1. Increase awareness of how cybersecurity and HIPAA requirements intersect within dental practices and dental laboratories.

2. Strengthen understanding of the legal, operational, and ethical responsibilities for protecting PHI during digital communications and data exchanges.

3. Equip attendees with best practices to reduce cybersecurity risks and prevent data breaches that could lead to fines, investigations, or business disruption.

4. Enhance operational readiness by helping participants identify vulnerabilities and implement safeguards that protect both their business and their patients.

Course Registration

SafeLink Consulting is the sponsor of this webinar course. This course provides a Q&A opportunity. The course is best suited for dentists and their practice or office managers, as well as dental laboratory owners and managers. This course requires no prior level of skill, knowledge, or experience. Course Presenters:

Matt Rahman, Board Member and Senior Compliance Advisor, SafeLink Consulting Inc.

Matt Rahman is a strategic executive and operator with more than 25 years of experience leading global teams, shaping technology-driven risk programs, and guiding organizations across healthcare, manufacturing, and financial services through build, scale, and growth strategies. As an strategic industry advisor to SafeLink Consulting, Matt helps dental and medical practices—as well as some of the nation's leading dental laboratories—integrate risk and compliance management into daily operations, transforming regulatory requirements into sustainable operational strength.

Prior to joining SafeLink's board, Matt held senior leadership roles in cybersecurity, fraud prevention, and technology-enabled services. He has managed multi-million-dollar P&Ls, driven organizational scale through both organic growth and M&A, and built high-performance teams across the U.S. and international markets. His expertise bridges business strategy with deep technical acumen, enabling him to translate complex regulatory and security requirements into clear, actionable steps that organizations can confidently implement.

Matt is also active in the broader cybersecurity, fraud prevention, and compliance ecosystem. He serves on advisory boards focused on emerging technology and risk governance initiatives, holds industry credentials, and frequently speaks at national healthcare, cybersecurity, and compliance forums.

Gary Morgan, CDT, CQA/ASQ, Partner and Senior Compliance Advisor, SafeLink Consulting Inc.

Gary Morgan guides businesses in implementing employee health and safety programs and quality management systems. Gary is an Authorized Trainer under OSHA's Outreach Program, a Certified Quality Auditor, and a Certified Dental Technician. His education and experience as a dental laboratory owner have provided a unique understanding that enables him to help companies integrate compliance in a way that not only mitigates risk but also benefits the business. He is a conference speaker and business consultant specializing in health & safety, quality systems, and regulatory compliance throughout the U.S and internationally.

Premier provider of safety programs, quality systems, and privacy practices.

Proudly serving the dental community for over 30 years
