

A Foundation of Trust. A Future of Confidence.

For more than **30 years**, SafeLink Consulting has stood alongside dental organizations as regulations, technology, and risk have continuously evolved. We were founded on a simple belief: **Compliance should strengthen organizations - not slow them down.**

WHO WE ARE

SafeLink Consulting is a specialty boutique advisory firm delivering integrated risk compliance for dental and healthcare organizations.

Unlike providers who focus on only one discipline, SafeLink operates at the **intersection of safety, environmental, quality, privacy, and security**, offering a unified approach across risk and compliance.

We serve as a single, trusted partner - a one-stop shop for organizations that understand risk does not exist in silos.

WHAT WE BELIEVE

We believe:

- **Safety, quality, and privacy are inseparable**
- **Security is a system**—people, process, and technology must work together
- **Compliance must evolve** alongside innovation
- **Experience matters** when navigating complex regulatory environments
- **Trust is earned** through long-term partnership, not one-time audits

HOW WE WORK

We are not a “check-the-box” firm. Our approach is:

- **Consultative, not transactional**
- **Tailored, not templated**
- **Practical, not theoretical**
